

Our Surveillance Solution How It Assists?

NUUO provides scalable surveillance solutions that fulfill the needs of monitoring, patrolling, and analyzing for clients of all sizes. The two key solutions are the Central Management System (CMS), for big enterprises, and the Intelligent Video Solution (IVS), for small and medium-sized businesses. However, these are not one size fits all solutions. No matter what the size of your business, NUUO will individually tailor a solution for you.

NUUO CMS

The NUUO Central Management System (CMS) is a powerful advance in CMS technology. CMS can manage an unlimited number of analog and IP cameras located worldwide, as well as allowing simultaneous operation by unlimited workstations. NUUO CMS is considered to be the omni-solution for large-scale projects, such as defense installations, justice facilities, security companies, city surveillance, national and international enterprises.
